Teacher talk and language grading
Giving clear instructions
Classroom management
Setting up and running activities
Giving effective feedback

SARGOI

Why clear instructions are so important?

- Efficient
- Give learners confidence
- Keep lesson running smoothly
- Increase opportunity for SC approaches

SARGOI

to help ss with covering activities successfully your instructions must be:

- **Simple**
- **Clear**
- **Logical**

SARGOI

Before giving clear instructions you should ask yourself a few important questions:

- What kind of task are my ss going to do?(interview, gaps completing, questionary, mingling,etc)
- How should they do it? (individually, in groups/pairs)
- How can I help them to complete the task successfully?(ICQs, body language, demo technique)

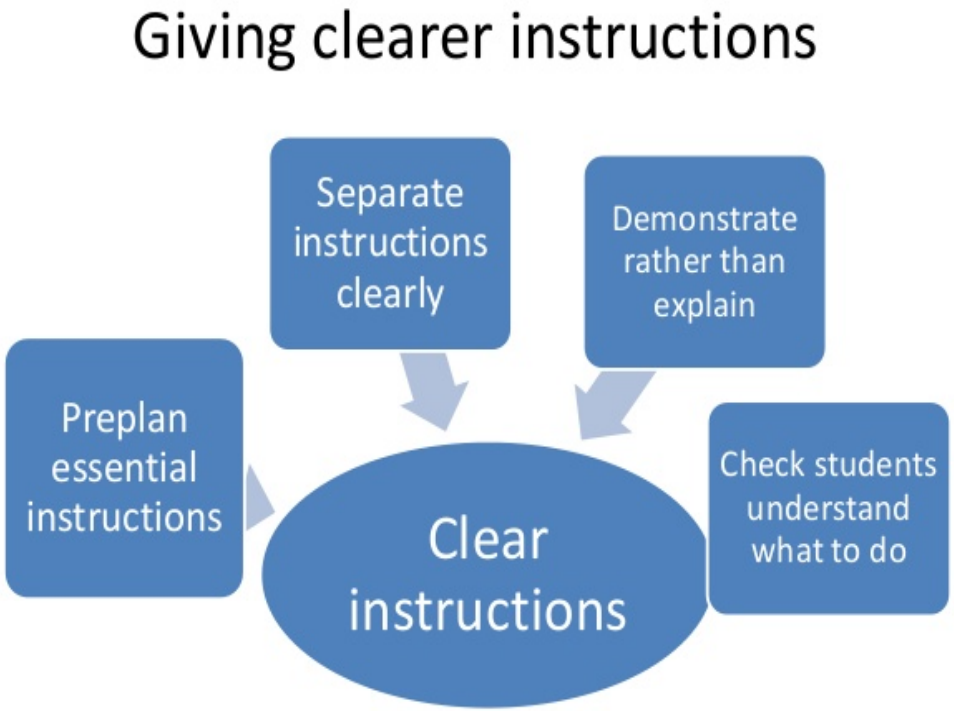
More hints



SARGOI

- To sound more naturally and friendly use Present Continuos rather than imperatives when asking ICQs «Are you making notes or labeling the pictures now»?

- Try to avoid Yes/No questions and questions like `Clear`? `Understand`? because the students are usually programmed to respond immediately with a confirming answer, even if they do not understand. A student can have no clue what he or she is about to do, and if you ask “Okay?”, the student will answer “Okay!” without even blinking.
